

Name: _____

EGG-speriment!

Hypothesis: What do I think will happen?

1. When I put an egg in **WATER**, I think it will:

- a) Explode
- b) Change color
- c) Move up and down
- d) Do nothing

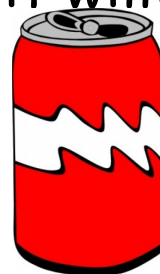

2. When I put an egg in **MILK**, I think it will:

- a) Explode
- b) Change color
- c) Move up and down
- d) Do nothing

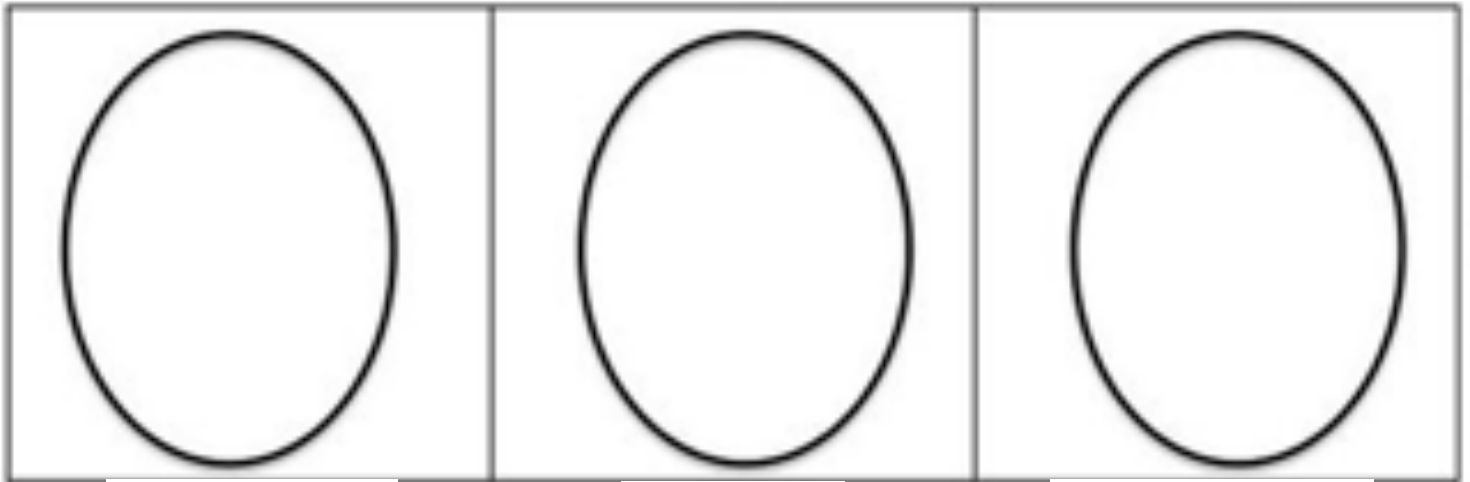

3. When I put an egg in **POP**, I think it will:

- a) Explode
- b) Change color
- c) Move up and down
- d) Do nothing

Results: What really happened

Water

Milk

Pop

Conclusion: Why is this important?

The shell on eggs is made from the same stuff as our teeth. The things that I eat and drink can hurt my teeth!

 GOOD for my Teeth	 BAD for my Teeth
